Major Benefits of Bamboo Salt:

Nature's Antioxidant

Powerful antioxidant that can be used daily as a supplement, to help your body naturally ward off the oxidation process and reduce damage caused by free radicals.

Rich in Minerals

Saltify Bamboo salt is an Organic compound rich in 80+ minerals originating from natural sources. In an analysis of bamboo salt compared to other Salt, minerals such as potassium, Calcium, Magnesium, zinc, iron, manganese, Phosphorus & sulfur are abundant in bamboo salt. Mineral deficiencies can cause many illnesses including osteoporosis, muscle weakness, fatigue, irritability and headaches.

Promotes Healthy Alkaline Levels & Reduces Unhealthy Acidic Levels

Strong alkalinity balance of PH 9+ helps to restore our alkaline PH levels (7.35-7.45) & neutralizes acidic toxins in our body. Diseases & other illnesses, like Cancer & the common cold, are more likely to occur in cells that are highly acidic.

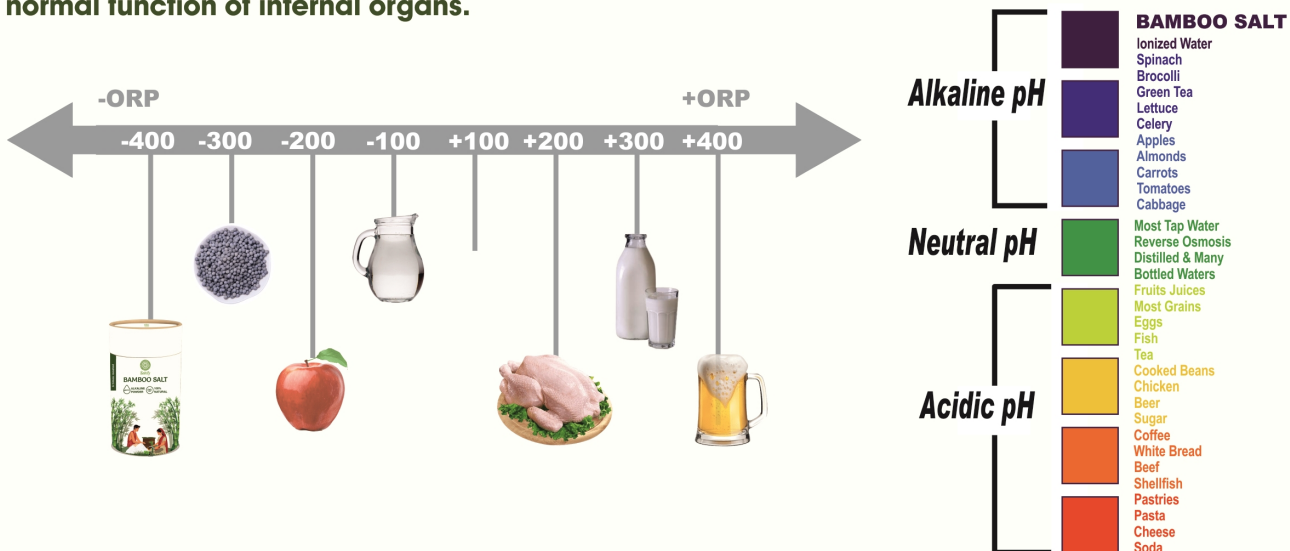

Elimination of Toxins

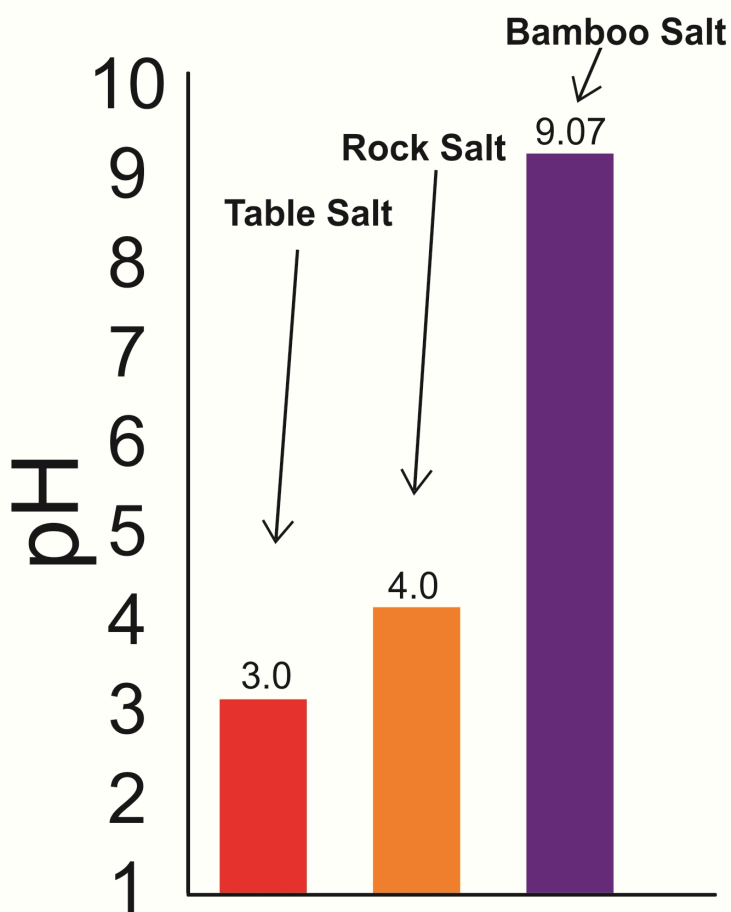

One of the best methods for detoxifying your body. After a detox program many people report substantial benefits such as improved energy, improved digestion, clearer skin, regular bowel movements and increased concentration.

THE ORP

Antioxidants are good for the body can be measured by the Oxidation Reduction Potential (ORP). ORP is measured by a positive or negative number. The more negative number is, the stronger the substance is as an antioxidant. For example, Saltify ultimate 6x Bamboo Salt has an ORP of -400 to -300mv. On the contrary, soda has an ORP of +400. Saltify Bamboo Salt is a Powerful antioxidant which helps heal damaged cells, inhibits the growth cancerous cells, helps to prevent premature aging & restores the normal function of internal organs.

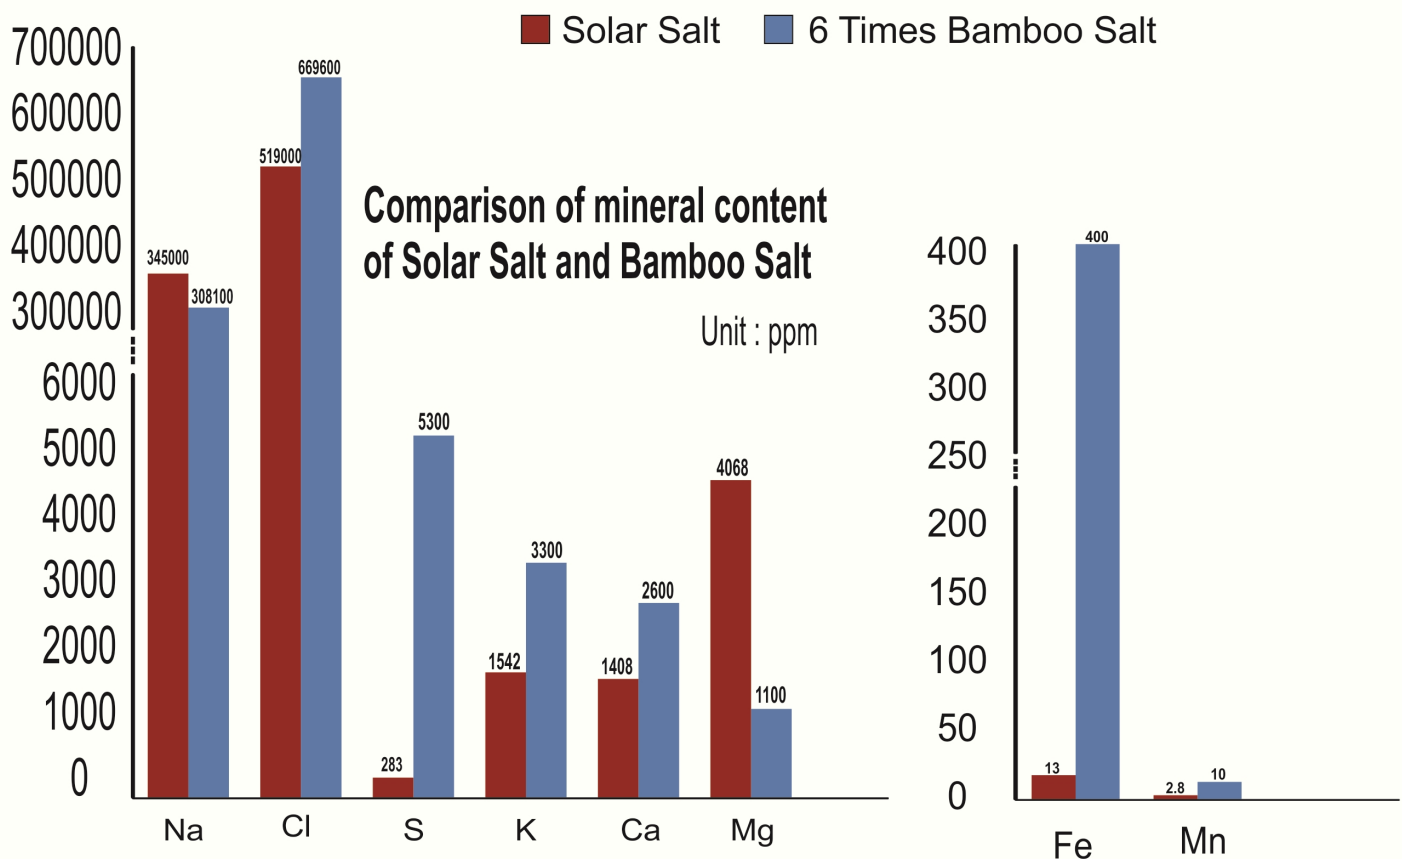

Scientific Inspection of Bamboo Salt:

6 times bamboo salt is excellent alkali food with 9.07 of pH.

Solar salt contains various mineral matters including calcium, magnesium, ferrum, manganese, phosphorus, sulfur and if it is processed by bamboo salt, contents of those mineral matters must be changed. Contents of sodium, potassium, chlorine, calcium, magnesium, ferrum, manganese, phosphorus, sulfur and zinc are increased. It shows that bamboo salt contains many mineral matters which would be called as multi-mineral.
